

<b>IDEJNO RJEŠENJE VANJSKOG UREĐENJA ZA NOVOIZGRAĐENI ŠOPING CENTAR</b>	
Kandidat:	Karač Ena
Mentor:	Prof.dr. Ammar Šarić, dipl.inž.građ.
Odsjek/katedra:	Saobraćajnice
Datum odbrane:	Na osnovu zapisnika
Sažetak:	<p>U sklopu luksuznog novoizgrađenog tržnog centra pod nazivom '360 mall' u gradu Al Zahra, Kuvajt, potrebno je uraditi projekat vanjskog uređenja koji podrazumijeva projektovanje pristupnih ulica, parkirališta te svih popratnih sadržaja koji će omogućavati siguran, brz i nesmetan pristup tržnom centru svim korisnicima. Primarni zahtjev za dizajn je da kompletan projekat izgleda harmonično, estetski lijepo, te da se pejzažno uklapa u sam tržni centar. To podrazumijeva da je i projekat vanjskog uređenja u kružnom obliku, kao i sam tržni centar.</p> <p>Ovim projektom je obuhvaćen projekat pristupne ulice, projekat dvije kružne raskrsnice, te projekat vanjskog parkirališta ispred i iza tržnog centra. Projektovan je spoj na glavnu saobraćajnicu, te pješačke staze uz saobraćajnice.</p> <p>Projekat podzemne garaže nije obuhvaćen ovim projektom.</p>
Ključne riječi:	Pristupna ulica, kružna raskrsnica, parking, odvodnja, pješačke staze
<b>CONCEPTUAL PROJECT OF EXTERIOR DESIGN FOR A NEWLY BUILT SHOPPING CENTER</b>	
Summary:	<p>As a part of the luxury newly built shopping center under name '360 mall' in the city Al Zahra, state of Kuwait, it is in need to make an exterior design project that includes the design of accessing streets, parking lots and all accompanying facilities that will provide safe, fast and uninterfered access to the shopping center for all users. The primary demand for design is that the entire project looks harmonious, aesthetically beautiful, and that fits into the shopping center itself. This implies that the exterior design project is in a circular appearance, as the shopping center itself.</p> <p>This project covers the access streets project, the project of two roundabouts, and the project of outdoor parking in front of and behind the shopping center. A connection to the main road and pedestrian paths along the roads also were designed.</p> <p>The underground garage project is not covered by this project.</p>
Keywords:	Access roads, roundabout, parking lot, drainage, pedestrian paths
